Rosie’s Broken to Brave Heroes

Trauma Cases for the month of June

1. Clara
Clara had a huge tumour growing in her abdomen, close to her chest. The weight of the growth made even walking an uncomfortable and exhausting task.

Radiographs revealed that the tumour was also internally attached to a part of her chest region, making surgery particularly challenging. Despite the risks and our apprehensions, we decided to proceed with the tumour removal surgery. Clara had an incredible zest for life, and we wanted to give her every chance to reclaim it.

And what a fighter she turned out to be! Clara endured the surgery bravely and sailed through her post-operative recovery like a trooper.

Once she had healed completely, Clara returned to her guardians, who were overjoyed to have her back, healthy and happy.

Thanks to the support that makes such treatment possible, Clara got her second chance at life and her joyful reunion with her guardians.

2. Grey
Grey was brought in with significant facial swelling caused by a bee sting. He received the necessary medical treatment, including antibiotics and supplements, and remained under our care for an extended period to ensure his recovery.

After prolonged care and monitoring, Grey recovered well and was finally ready to return to his familiar surroundings. ❤️
